The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Examiner acknowledges receipt of request for extension of time, amendment and remarks filed 01/03/05. New claims 50-54 are pending.

Claim Rejections - 35 USC § 112

1. The rejection of claim 45 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in light of the cancellation of the claim.

Claim Rejections - 35 USC § 102

2. The rejection of claims 44 and 46-49 under 35 U.S.C. 102(e) as being anticipated by Eichman (US 5,980,882) is withdrawn because of the cancellation of claims 44 and 46-49.

Claim Rejections - 35 USC § 103

3. The rejection of claim 45 under 35 U.S.C. 103(a) as being unpatentable over Eichman (US 5,980,882) in view of Chow et al. (US 4,160,827) is withdrawn in light of the cancellation of claim 45.

However, the new claims presented give rise to new grounds of rejection.

4. Claims 50-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chow et al. (US 4,859,461).

Chow discloses a composition that comprises AMBERLITE-70 and pharmaceutically active basic drugs selected form dextromethorphan, codeine, hydrocodone, morphine and propranolol and an impregnating agent selected from hydroxypropylmethyl cellulose, hydroxypropyl cellulose, sorbitol, hydroxypropyl sorbitol, and polyvinylpyrrolidone for a prolonged continuous release of the active drugs. Chow further discloses that the hydroxyl alkyl

Art Unit: 1618

celluloses are present in amounts ranging from about 3% to about 20% and that the polyvinylpyrrolidone are present in amounts ranging form 7% to 20%. See column 1, lines 36-58 and column 2, lines 12-63. The particle size of the resin is from about 25 µm to about 1,000 μm (column 2, lines 53-57). A point in the particle size range of from about 25 μm to about 1000 µm reads on 50 µm. There is no demonstration that the amount of the resin recited in claim 50 provides unusual results. Chow does not disclose the amount of the drug that is bound to the resin. However, differences in amounts or concentration will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such amount or concentration is critical. And "[w]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare the hydrocodone containing composition of Chow. On having ordinary skill in the art would have the know how to determine how much drug is needed for incorporation with the resin and the cellulose impregnating agent with the expectation having the desired drug dissolution profile.

5. Claims 50 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chow et al. (US 4,859,461) in view of applicants admitted prior art.

Chow is described above. Chow's drug-resin does not include phenolic amine resin.

Examples of phenolic amine resins are AMBERLITE IRP-58 (applicants' specification at paragraph [0027] of the published application # 20040062812). Applicants are aware that IRP-58 and IRP-69 are equivalent and as a teaching reference IRP-69 and IRP-70 are equivalent

Art Unit: 1618

(Eichman, US 5,980,882, column 6, lines 45-48). It would have been obvious to one of ordinary skill in the art at the time the invention was made to prepare hydrocodone-containing formulation and to substitute IRP-70 with IRP-58 with the expectation of producing analgesic formulation.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).

Application/Control Number: 10/657,011

Art Unit: 1618

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page can be reached on (571) 272-0602. The fax phone number for the

organization where this application or proceeding is assigned is 571-272-1600.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
